

LINO

DESIGNED TO DISAPPEAR

Tracktrim® by LINO is a perfect fit solution to recess manual and electric curtain tracks. The track and end set are installed flush with the ceiling during construction to form a cavity matching the drapery system and can be painted to match the ceiling. Standard curved sections are available to fit corners, curved walls, bay windows and other applications. When curtain tracks are installed, the result is a minimalist design where curtain tracks fully blend in, flush with the ceiling.

standard S SERIES

The standard for hiding roller blinds.

standard S SERIES

Lino's Series is a concealment box made to hide roller blinds with minimal visual impact. The box is installed during construction with the space accessible for blinds installation when the room is completed. It features the patented Lino Safety Hinge that secures the cover in place and can be installed in any direction, allowing for side boxes to hide blind side channels or guide wires. Popular in floor-to-ceiling windows and sliding doors, S Series can be installed to future-proof buildings to have the option for later installation of concealed blind

S100x100 Headbox

Blinds up to ~2400 wide*

* Blind sizes depend on blind products used, boxes provided up to 6000 wide.
